

AI Automation Starter Kit — FREE Sample (3 of 10)

A free taste of the full kit. Here are 3 copy-paste AI automations you can use today on a free ChatGPT or Claude account. If they save you time, the full kit has 7 more (email, content, support, leads, invoices, reports & data).

■ Get all 10: <https://berkay85.gumroad.com/llzrnk>

How to use: replace [BRACKETS], paste into ChatGPT/Claude, edit the output.

1. Instant lead reply drafts

You are my sales assistant. Here is an inbound message from a potential client: "[PASTE]". Write two short, warm reply drafts (max 90 words each): one friendly-casual, one professional. End each with a single clear next step (a question or a booking link). No fluff.

2. Content repurposing engine

Turn this into a content pack: "[PASTE blog/idea/transcript]". Output: (a) 1 LinkedIn post, (b) 3 tweets, (c) 1 Instagram caption with 5 hashtags, (d) 1 short-video script (≤45s) with a hook in the first line. Keep my voice plain and concrete.

3. Weekly report from raw notes

Here are my rough notes/numbers for the week: "[PASTE]". Produce a 1-page report: Wins, Problems, Numbers (small table), Next week's top 3 priorities. Be concise and honest; flag anything that looks off.

Liked these? The full **AI Automation Starter Kit** has all 10 blueprints (plus the customer-support bot, invoice reminders, cold-email drafts, meeting notes, review requests and data cleanup) for **\$9.99** — with lifetime updates and a 30-day money-back guarantee.
