How to use: replace [BRACKETS], keep it short, send.

1. The 5-line winning proposal

Hi [NAME] — you need [restate their goal in their words]. I've done this before: [1 specific result/example]. Here's how I'd approach yours: [step 1], [step 2], [step 3]. I can start [when] and deliver a first version by [date]. One question: [smart question that shows you read the brief]?

2. Price-anchoring reply

Projects like this usually run [\$X–\$Y] depending on [1-2 scope factors]. For your scope I'd suggest [\$Z], fixed, so there are no surprises. Want me to break down exactly what's included?

3. Turn one project into a retainer

Instead of one-off requests, I can keep [outcome] running for you at [\$X/month] — [what's included]. Predictable for you, no re-quoting each time. Want to try it for a month?

Liked these? The full **Win-the-Client Proposal Pack** has all 10 scripts — no-portfolio opener, handling "too expensive", scope-creep boundary, deposit ask, delivery message, re-engaging quiet leads, and raising your rates — for **\$9.99**, with lifetime updates and a 30-day money-back guarantee.
